

To Whom It May Concern,

I am writing to offer my strong and enthusiastic recommendation for Parmila Khapangi, whom I had the pleasure of working with at Bayer Crop Science during her time as a contract biologist.

Parmila was an exceptional employee who consistently demonstrated professionalism, responsibility, and a proactive approach to her work. She was always willing to learn, eager to take on new challenges, and dependable in following through on tasks. No matter the situation, Parmila approached her responsibilities with care, attention to detail, and a genuine desire to do her best.

One of Parmila's greatest strengths was her leadership in the lab. She naturally led by example, setting a high standard for others through her work ethic, accountability, and positive attitude. Other employees looked to her as a role model, and she was always supportive and encouraging to her teammates.

Parmila also brought an incredible energy to the workplace. She consistently maintained a positive attitude and a warm smile, which made her a joy to work with and contributed to a collaborative and uplifting team environment. Her presence had a meaningful impact on team morale, and she was well-respected and appreciated by everyone she worked with.

I am confident that Parmila will be a valuable asset to any organization. She has the skills, mindset, and character needed to succeed and grow in any role she takes on. I recommend her without hesitation and believe she will continue to excel in her future endeavors.

Please feel free to contact me at megan.hassebrock@bayer.com if you require any additional information.

Sincerely,
Megan Hassebrock
